Professional Summary

Recent B.Tech graduate in Computer Science and Engineering (Artificial Intelligence & Data Science) with a CGPA of 8.23. Skilled in Python, SQL (MySQL), Excel, and problem-solving with hands-on academic projects in facial recognition and database management. Seeking an entry-level Data Analyst or IT position.

Technical Skills

Python, SQL (MySQL), Excel, Power BI (Basic), SQLite, Git, GitHub, Analytical Thinking, Problem Solving

Education

B.Tech in Computer Science & Engineering (AI & Data Science)
St. Peter's Engineering College
2022–2026 | CGPA: 8.23/10

Projects

Facial Recognition Based Attendance System

- Python, OpenCV, Haar Cascade, SQLite
- Automated attendance using facial recognition and real-time face detection.

Explainable Crash Severity Analysis of Two-Vehicle Accidents Using Interpretable Learning Models

- Python, Django, Pandas, NumPy, Scikit-learn, XGBoost, SQLite
- Contributed to the implementation and testing of an academic machine learning application for two-vehicle crash severity analysis using Python and Django.

Library Management System

- Python, MySQL
- Managed book issue, return and inventory records.

Certifications

Python Programming, SQL, POWER BI, ServiceNow, TCS iON Communication Skills, Infosys Springboard Data Structures in Python, HackerRank C

Languages

English, Telugu, Hindi
